- (A) **QPRS (Correct Answer)** (Chosen option)
(B) QRPS
(C) SQRP
(D) SRQP

Case Study - 4 to 8

5.00

Directions for questions 1 to 5- Read the short passage below and answer the questions that follow.

The trail of death and devastation that Cyclone Amphan has left in West Bengal and Odisha demonstrates, once again, the fragile state of eastern coastal States during the storm season. At

least 72 people are dead in Bengal and normal life is paralysed for millions in Kolkata and in the rural areas of both the States. That Amphan would be a terrible disaster was anticipated, but even with reliable forecasts of its movement since May 16, and the preparatory moves by National and State Disaster Response Force units, the impact has been catastrophic. The States along the east coast have evolved a code of practice for a storm coming under category 3 and above: evacuations, arranging for backup power, warning people to stay far from the coasts, designating strong buildings as cyclone shelters, and providing for at least a week's supply of cooked food besides bolstering medical supplies. Yet, the loss of life and damage to livelihoods is always significant. This time has been no different, and the Centre and the governments of the affected States, including those in the Northeast lashed by heavy rain, must help people already weighed down by a severe lockdown pick up their lives again. There is an additional challenge, as thousands of people have been moved to crowded shelters where the COVID-19 pandemic poses a continuing threat. Adhering to hygienic practices, monitoring those requiring medical assistance and testing for the virus is a high priority.

India's cyclone warning system has made major advances for being able to provide clear warnings and saving lives but the **precarious** lives led by millions of citizens have once again been subjected to a severe shock. Many who were working in distant States have just returned to Odisha and Bengal in the wake of the economic paralysis caused by COVID-19, and need sustained support after the storm. West Bengal Chief Minister Mamata Banerjee has appealed for strong support from the Centre, which the State must be provided to help it overcome the double jeopardy of the pandemic and the cyclone. Encouragingly, some vital activities such as functioning of the Kolkata airport were restored a day after the cyclone struck, facilitating movement of essentials, and additional NDRF personnel despatched to restore normalcy. The challenge is to provide pre-fabricated facilities for safe shelter in outlying areas, such as the Sunderbans, and use off-the-shelf solutions such as solar power to mobilise communities. While the battle against the virus may yet be won sooner or later, India must strengthen its response capabilities for a never-ending cycle of storms along its coastline.

Question No.4
